

# ArcheryKeeper: Quick Start Guide

---

This is a standalone web app file. You do not need a server to run it, but you do need an internet connection (because it loads styling and icons from external sources).

(Tip: This app is designed for mobile phones. It will look and work best if you open it on your smartphone.)

---

## 1. Setting Up a Round

Before you start shooting, you need to configure the round:

- **Select Round Type:** Choose from standard formats like IBO (3D), NFAA (300/360), or Vegas.
- **Pro Tip:** Use the Custom Round Builder to create your own mix of targets, distances, and scoring rules (perfect for multi-distance targets or mixed 3D and bale targets).
- **Add Shooters:**
  - Enter a name.
  - **Competitive:** Select Gender, Age, and Shooting Style Classification.
  - **Casual:** Toggle "Fun Class" to skip the details and just shoot!
- **Start:** Once all shooters are added, tap the big green **START ROUND** button.

## 2. How to Score

The scoring screen is designed for speed and ease of use:

- **Enter Scores:** Tap the large colored buttons on the keypad. The values change automatically based on the round you selected (e.g., 11-10-8 for 3D, or X-5-4 for NFAA).
- **Correcting Mistakes:** Tap **Undo** to remove the last arrow entered.
- **Next Shooter:** After the scorekeeper enters a shooter's score, press **Next** to switch to the next person.
  - *Note: You can move to the next shooter even if the current one hasn't finished (useful if scorekeeper needs to score someone out of order).*
- **Completing an End:** When the last shooter's score is entered, the app will automatically advance to the next End.

### 3. Managing the Game

- **Reorder Shooters:** To change the order of the shooters, go to the scoring screen and tap the **Arrow Icon** (located at the top right, next to the scorecard). This will open the list of shooters. You can then use the arrows to the right of a shooter's name to move them up or down into the desired sequence.
- **Reset:** Need to start over? Tap the **Rotate Icon** in the header to reset the round (Warning: this clears current scores!).

### 4. Scorecard & Sharing

Tap the Table Icon in the header at any time to view the full Scorecard.

- **View Stats:** See running totals, X-counts, and half-totals.
- **Edit Scores:** Did you find a mistake from 3 ends ago?
  1. Open the Scorecard.
  2. Tap on the specific arrow bubble you want to change.
  3. Select the correct score and hit "Done".
- **Share:**
  - **Share Image:** Generates a beautiful image of the scorecard to save to your phone or text to friends.
  - **Copy to Share:** Copies a CSV format to your clipboard for spreadsheets.

### 5. Saving Data

- **Auto-Save:** The app automatically saves your progress to your device after every score is entered. If you close the browser and come back, your game will be waiting for you!
